

Homaxi

Smart Dual Illumination

The Homaxi Smart Illumination technology using smart algorithm to detect targets accurately. The IR illuminator is always on at night, and the warm light turns on when a target enters into the monitored area, delivering full-color images.

Smart Dual Illumination

Three illumination types – smart illumination, warm light and Infrared lamp mode. Switch between Infrared lamp and warm light when a target is detected.

Illumination Schedule

Set the illumination modes according to different time periods.

Human/Vehicle Classification

Focus on human and vehicle, filter out false alarms triggered by swaying leaves, the movement of clouds, or even the appearance of little animals.

Built-in Mic

Audio and video synchronous recording.

Real-time Alarms

Instant alarm notifications are sent to mobile device, help to keep aware of any activity on your property.

Full Color Event

Full-color images to capture accurate details.
